

Available in most kitchen areas is a Nutone built-in motor unit and blender. This appliance is powerful and easy to use, taking up very little counter space.

The kitchen and dining area of the Teton is designed with the chef in mind. The side dinette adds a feeling of space, while the rear kitchen models are well lit and airy.

Rear and front kitchen models feature large counter space across the end of the unit. Note the optional gooseneck faucet which is equipped with a purifier to make your water taste mountain spring fresh.

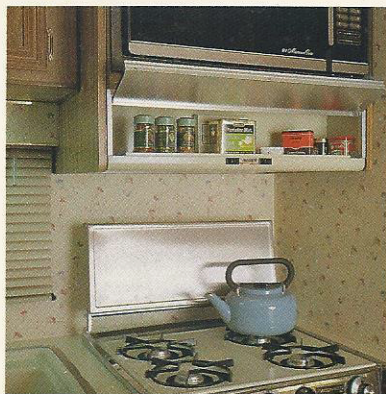

Optional free-standing dinette table and chairs or a breakfast bar is available in most models.

Teton kitchens are provided with a refuse caddy out of sight in a base cabinet.

Throughout Teton kitchens, our engineers have included every convenience and space-saving feature possible. Many fine meals can be prepared with the 4-burner gas range and oven.

For even greater convenience, quality, brand name microwaves are available. A space-saving, built-in spice rack is located in the front of the range hood.

Quality furnishings are everywhere. Genuine hardwood maple bread boards and a handy knife storage tray are just a beginning. The only thing missing from the Teton kitchen is the food itself.
