

Available in most kitchen areas is a Nutone built-in motor unit and blender. This appliance is powerful and easy to use while taking up very little counter space.

MOCHA VELVET DECOR

Rear and front kitchen models feature a large countertop across the end of the unit. This unique arrangement allows you to prepare fine meals without being disturbed. Teton rear kitchen models are the most popular units we build.

SALMON LINEN DECOR

Teton kitchens are provided with a refuse caddy out of sight in a base cabinet.

Quality furnishings are everywhere. Genuine hardwood maple bread boards and a handy knife storage tray are just a beginning. The only thing missing from the Teton kitchen is the food itself.

And for even more countertop space, try the breakfast bar option, with two bar stools standard and loads of cabinets. The flush-mounted gas/electric Norcold refrigerator with top controls has also been added for your convenience.
