

There's an abundance of both interior and exterior storage in all Teton models.

The continental spare tire cover easily opens and stays open with the aid of gas-filled struts. This door provides easy access to the spare tire as well as additional exterior storage. Note the flush-mounted rear rock shield awning, the wraparound taillights and automotive styled bumper.

There's plenty of storage in the kitchen area, including an optional five bin slide-out pantry that is available in most models. (Model shown with three of the five bins in place).

Drawers are provided under the range and dinette with additional storage available under the dinette seats.

Exterior storage is provided on all sides of the Teton units. There is always plenty of room for sporting equipment plus recreational items you might need.

A large storage area is provided under the floor of the front walk-thru bathroom in the fifth

For even more storage, an optional hinged pedestal bed is available. In this space you can store any extra bedding, luggage or other odds and ends. If it's storage you want, you can't beat a Teton.

wheel models. For your convenience, on larger models the trap door is held open with gas-filled struts.
