

Teton also offers a beautiful front living room model, the Williamsburg, with 6' 2" ceiling height throughout the living room area. The solid oak doors, etched glass, and foam padded wine glass rack are standard on every Teton we build.

The largest Teton living room comes in this 37' Memphis model with 8-1/2' center slide-out. The full sloping ceiling adds a feeling of spaciousness not found in other manufacturers' units.

High places are no longer out of reach with this unique foldable oak step capable of supporting over 400 pounds. This step comes in either an 8" exterior version or the 12" interior model, shown here. And, it folds to 3" wide, so you can store it just about anywhere.

Although having enough space is not a concern, cleaning this large area might be. However, Teton has solved that problem as well with this built-in vacuum cleaner that comes with 30' of hose and a super powered turbine brush attachment.
