

Teton's standard bedroom utilizes a 60" x 80" queen bed and offers 6'4" of headroom while still maintaining a low exterior profile.

Matching bedspreads, headboards, pillowcases and curtains truly make this your home. All of Teton's beds offer gas struts to hold the bed up while you're storing items underneath.

Enjoy security and peace of mind by storing your valuables in an optional built-in combination safe. Safely concealed in an out-of-the-way location, welded to the steel chassis and using a combination you choose, the safe protects your valuables from casual theft.

A rotated bedroom with a full size 54" x 74" bed is available as an option in most 5th wheel models. Units with the rotated bedroom standard receive a 60" x 74" bed. This feature gives you a full length closet along the front of the coach with loads of drawer space.
