

Imagine an interior living area 15' wide! "Grand" models by Teton® are in a high end class, having many of the same features as the "Royal".

Check out our floorplans to see which models offer the largest open area available anywhere. You can even put a 25" TV in the entertainment center, along with numerous other components and personal items. All models feature leaded glass, mood lighting and raised panel oak doors. Day and night shades are standard on all models.

All our interiors are professionally designed and feature coordinated draperies, carpeting, plush swivel glider recliners and hide-a-bed couch to give you the look and comfort of the finest home.

How's this for an option? Real oak plank floors in kitchens and entryways that give that rich, elegant look.
