

Experience Affordable Teton Luxury

Teton's beautiful, patent pending solid surface counter tops (in kitchen and bath) feature integrated sinks and backsplashes for easy care and durability.

The only place you'll find a kitchen of this caliber is in a Teton or a very fine home. Experience models have a residential kitchen with the same amenities as our other models, including an optional island, abundant storage, a glass front oven door, a range with sealed burners, a microwave with turntable, and an optional ceiling of light with warm white fluorescent bulbs. To ensure uniform color and great style, all our cabinets feature the industry's highest grade hand selected oak.

This Experience Laramie bedroom with Garden Paradise decor features the optional king bed and spacious radius tub affording plenty of room for showers or baths.

The radius tub has an easy-clean surface. A frosted dome skylight follows the contour of the tub.

Handy wrap-around shelves feature mirrored insets for a feeling of openness in the bedroom slideout. Lower shelves are positioned so the bed is easy to make. Storage under the queen size mattress is accessible in a snap, thanks to gas struts that do the lifting. Above, you can see the rich wood beauty as well as the function of the Experience full wall wardrobe.
