

Specializing exclusively in luxury class fifth wheels for 38 years.

We do one thing and we do it right.

In 1967, Teton Homes® were built to provide oil field housing in remote locations. They weren't large or luxurious but they offered precisely what our owners needed.... protection from the elements, the comforts of home and dependable performance, even in the rugged country found in the Rocky Mountain area. Although the original Teton's® didn't look like today's models, they established a firm foundation for the business principles that would take us through 38 years of continuing success.

In those early years, we learned that the best way to do something well is to specialize in doing just one single thing. One manufacturer cannot possibly meet the needs of every RV enthusiast. At Teton Homes®, we don't even try. Instead, we continually refine and improve the comfort and efficiency levels of our single product: luxury fifth wheels.

We listened to our customers when they told us what they needed in an RV they plan to call home 365 days a year. As a result, we increased the flexibility and comfort of our fifth wheels, developed exceptional levels of storage capacity and became the industry leader in innovation of floor plans, features and options. We never scrimped on comfort or sacrificed quality to satisfy the bottom line. Through the years Teton Homes® carved out a niche in the fifth-wheel market that is all our own. That's why Teton® is one of the world's top luxury fifth wheels and the number-one choice of America's full-time RVers.

When it's time for your RV dreams to become reality, choose the only RV whose name is synonymous with excellence. After all, we don't build just any luxury fifth wheels; we build Teton's®.

One of Teton's® first models built in 1967.

Teton Homes® corporate offices and production facilities with 124,000 sq. ft. under roof located just west of Casper, Wyoming.
