

Royal

Exceptional Comfort

Royal Teton's bedroom (far right) is a sweet dream come true with a marvelous combination of comfort, beauty and function. Both Royal and Grand have the bedroom and bathroom on one level in Teton's LevelOne master suite.

An inviting queen bed has a manufacturer's limited ten-year warranty. A chic bedspread, dust ruffle, pillow shams and throw pillows are beautifully matched in Moonshadow decor with oak trim.

New this year is a handsome wood and fabric headboard (inset at right) that compliments the window valances. A beautiful blend of windows, shelving and mirrored cabinetry surrounds the bed for added storage and superb style.

Royal's full-wall dresser (this page) has a functional, flexible choice of either optional shirt closets or drawers and shelves, or the standard alcove with tri-fold mirrors, a multi-purpose drawer for use as vanity or desk storage, a six-drawer dresser and a handy pull-out hamper. A cedar shoe shelf is standard in the front mirrored wardrobe. At right is Royal's generous under-bed storage compartment with easy-lift gas struts. To the right is our new optional solid oak headboard.

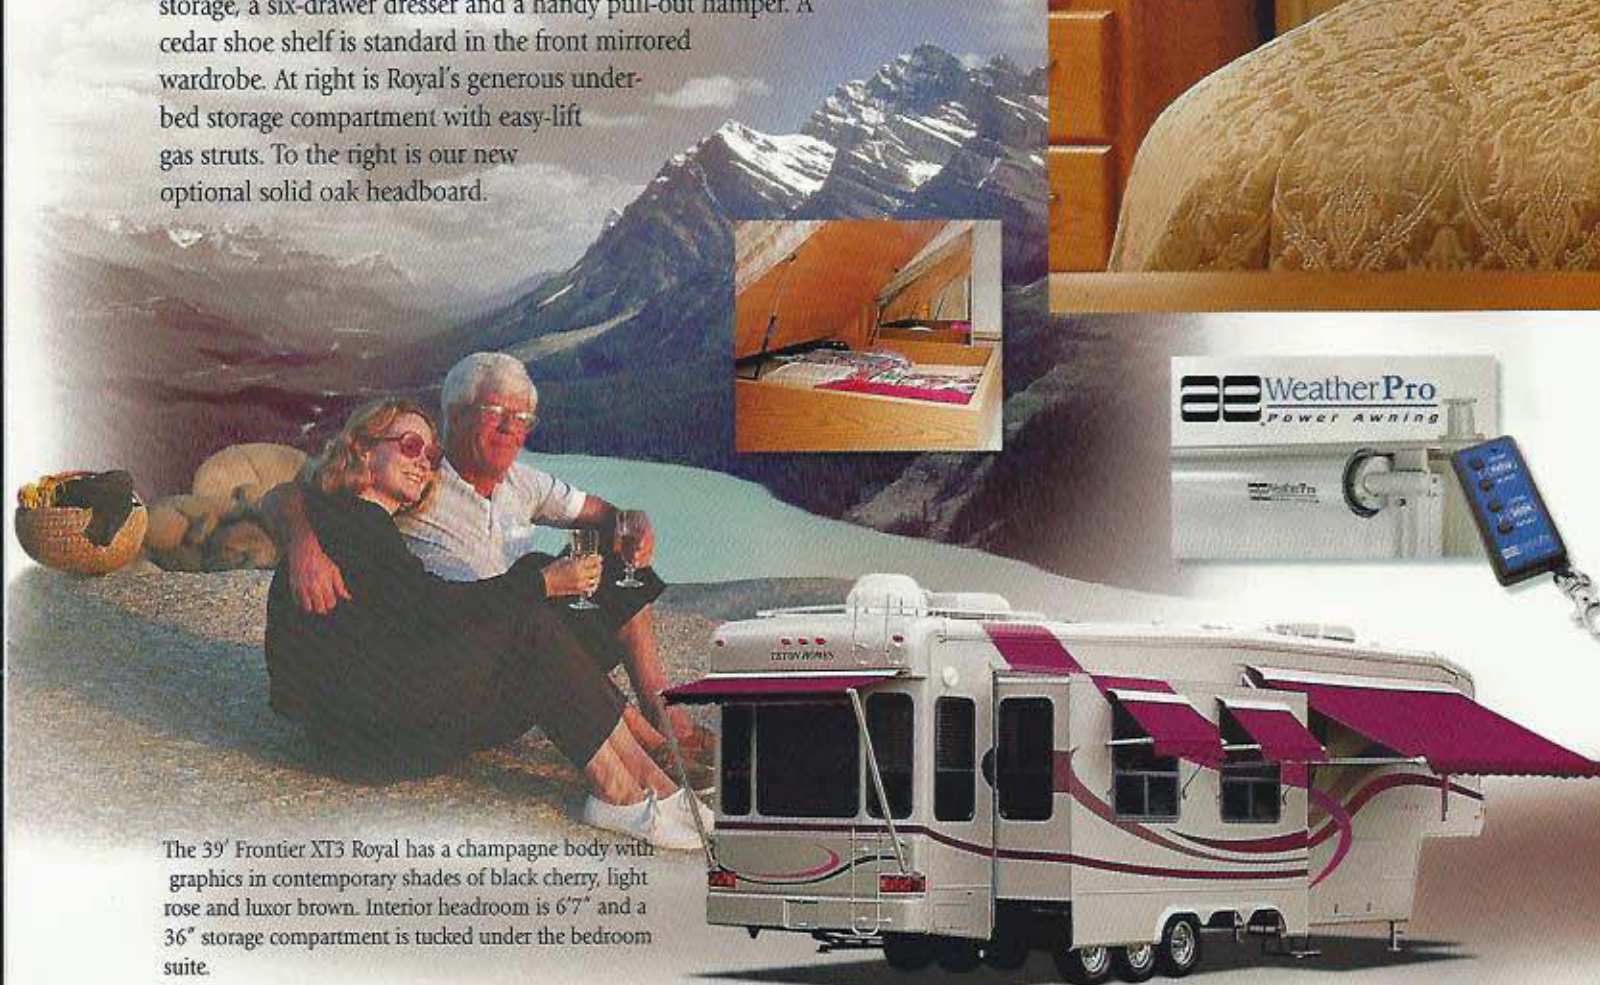

Model - 39' Frontier XT3 Royal with Moonshadow decor and oak cabinetry

Standard Royal Headboard

The optional solid hardwood, raised panel headboard, with fluted bed posts, shown above in natural maple, is available on all model lines.

The 39' Frontier XT3 Royal has a champagne body with graphics in contemporary shades of black cherry, light rose and luxor brown. Interior headroom is 6'7" and a 36" storage compartment is tucked under the bedroom suite.

Outside, Royal is sleek and beautiful with a choice of full body paint designs, all with sweeping painted graphics and protective clear coat. Optional awnings are color matched to exterior paint schemes and feature a wind sensor that automatically closes the awning in sustained winds, an automatic water release and a hand-held remote control.

36" tall luggage doors

"Last winter we stayed home in Alaska and put our Teton to the test. It came through with flying colors even during a cold snap with lows at -42°F and highs at -25°F. We are impressed with your product! Should we decide to buy another fifth wheel you can bet it will be a Teton." Daniel and Helen Drake Sterling, Alaska
