

# Built to Withstand the Elements 365 Days a Year

Teton's T-joist roof system is one of the lightest, strongest and best insulated in the industry with a composite R value of 25.

Teton's central air conditioning two-duct system has a 70% sound reduction from most roof-ducted air-conditioning systems.

High gloss fiberglass for an exceptional exterior look and weathering quality.

Fiberglass and lauan panels are manufactured to form a one-piece exterior skin by laying the panels into the wet fiberglass and vacu-bonding them together. This one-piece composite is then applied to our vacu-bonding process of the wall frame. This means added structural integrity and durability to the customer.

Dovetailed drawer assemblies are crafted to last and glide easily on steel epoxy enameled double-roller drawer guides. Available in the Royal only.

European-style hidden face-frame hinges mean there are no unsightly hinges or visible screws in Teton's rich oak cabinetry.

Our vacu-bonded sidewalls are lighter and stronger than walls with "hand laid-up" exterior glass, and feature an overall insulating value of R10.

Our patented chassis design allows for enormous storage in our BIG & TALL® space, once again setting the industry standard in storage.

Teton's team of designers have developed a patented unique chassis that allows for Teton's BIG & TALL® storage spaces below the raised bathroom and bedroom floors. Without sacrificing strength or structure the patented design allows for a light weight yet ridged superstructure of steel and wood components. See U. S. patent numbers 6,343,830 and 6,502,894. Other patents are pending.

**TETON'S BIG & TALL STORAGE**  
U. S. PATENT NOS. 6,343,830 & 6,502,894

Full-width slider panels for easier access to electrical panels

18 gal., 14 gal. and 10 gal. storage bins shown

**TETON'S BIG & TALL STORAGE**  
U. S. PATENT NOS. 6,343,830 & 6,502,894

Standard in Experience

Opposing doors for "flow through" storage

Optional sliding storage trays can be fully extended for access and loading from either side of the coach

Completely level floor! (No saddle bags found in other brands)

Lighted & heated throughout entire storage area

Low ground-to-floor spacing making it easier to load and unload your storage

Limited storage due to plumbing vents and other protrusions in storage compartment

Low overall compartment height

Added lift height (difficult to load/unload)

Narrow "saddle bag" storage makes it difficult to store large items.

Jack legs are moved in - hard to get to the pins and is not very stable

Gas struts assist in opening the large baggage doors and hold them open or shut

Numerous access points through multiple extra-large doors

Opposing doors for "flow through" storage

Optional sliding storage trays can be fully extended for access and loading from either side of the coach

Completely level floor! (No saddle bags found in other brands)

Lighted & heated throughout entire storage area

40-lb LP-gas cylinders

Unmatched vertical floor to ceiling clearance (throughout entire compartment)

Completely level floor! (No saddle bags found in other brands)

Low ground-to-floor spacing making it easier to load and unload your storage

Jack legs right next to the outside makes the spring-loaded jack-leg pins very easy to get to and makes the coach very stable

Opposing doors for "flow through" storage

**36" Supersized**  
Standard in Royal & Grand

Numerous access points through multiple extra-large doors

**TETON HOMES**

36"

Lighted and heated throughout entire storage area

40-lb LP-gas cylinders

## The Ultimate in RV Storage

You won't believe the amount of space our Big and Tall Storage® system provides! Lower ground-to-floor clearance, access points through multiple doors, a level floor and opposing doors for flow-through storage makes your Teton incredibly easy to load and unload. Check out the comparison of our storage versus traditional RV storage shown at the bottom of the page and consider all the gear we packed into just ONE Teton® model (at left); about twice as much as would fit in other RV brands. Want the ultimate in easy? Ask about our optional sliding tray that can be fully extended for access and loading from either side of the coach.

ATV supplied by Karst Motorsports Sales and Service.

**Exterior storage space provided by other manufacturers**
