

Royal... FUNCTIONAL LUXURY

Big, beautiful Royal kitchens are designed for maximum function. Standard amenities include generous solid surface countertops, an eye-level microwave with turntable, sealed-burner range with piezo ignition, glass front oven door, a large refrigerator, and a stainless steel sink with brushed nickel faucet having a pullout sprayer head

40' Aspen Royal XT3 LTD features Venetian decor including maple wood with cherry stain and optional granite counter tops

Kitchen storage (at left) is plentiful thanks to solid wood cabinetry, an optional island and several drawers. Teton's extra large pantries (below) have adjustable pull out drawers for optimal storage and easy access.

Function and luxury come in many different forms including (above, left to right) Royal's handy in-island wastebasket; fluted columns and carved corbel blocks on solid wood slideout trim; and a stereo AM/FM receiver with a five-disk DVD/CD sound system and five ceiling-mounted 5.1 speakers.

Optional built-in wine cooler in the living room end of the island base cabinet

The comfortable slideout queen bed with an eased-corner innerspring mattress is accented by a wood with fabric headboard with mirrored cabinets/shelving and decor-matched bedspread, duster, shams, and throw pillows.
